

Fertility services

As a Kaiser Permanente member, you'll have a trusted team of specialists and care coordinators who can access your medical history and coordinate your care based on your personal needs.

Available covered services include:

- Gamete intrafallopian transfer (GIFT)
- In vitro fertilization (IVF)
- Zygote intrafallopian transfer (ZIFT)
- Transfer of cryopreserved embryos

Visit kpivf.com for information on how to get started.

Your plan benefits

- Fertility treatment drugs: Plan pays 90%*>
- 2 treatment cycle lifetime lifecycle max
- Cryopreservation and storage of embryos for up to 6 months

Many Kaiser Permanente members have coverage for the diagnosis and treatment of infertility, and some members have coverage for in vitro fertilization (IVF) procedures if IVF is listed as a covered benefit in the *Evidence of Coverage* for their Kaiser Permanente health benefit plans.

Effective January 1, 2020, certain fertility preservation services are a covered benefit for some plans under California law. For these plans, when a covered treatment may directly or indirectly cause iatrogenic infertility, standard fertility preservation services are a covered service distinct from covered infertility treatment services. "Iatrogenic infertility" means infertility caused directly or indirectly by surgery, chemotherapy, radiation, or other medical treatment.

Except where covered under your health plan benefits, the services described here are provided on a fee-for-service basis. Clinical services are provided by providers or contractors of The Permanente Medical Group, Inc., and Kaiser Foundation Hospitals may receive compensation for providing facilities and/or other support in connection with these services. For specific information about your covered health plan benefits, please see your *Evidence of Coverage*.
